Resume

Recently graduated Civil engineer in Learning and Experience Technology. My focus as UX / UI designer is to design the good experience through user-friendliness. I do this by meeting with the users, trying to understand what their needs and wishes are. With my knowledge in programming and UI design, can I develop prototypes that I can test iteratively with users.

Work experience

UX Designer Cabinplant A/S (Internship)
Okt. 2018 - Dec. 2018

In my internship at Cabinplant a/s, I helped improve one of their HMI to one of their weighing machines, by making it more user-friendly for operator.

Education

Civil engineer in Learning and Experience Technology
University of Southern Denmark –Bachelor's degree
2013 - 2016

Odense Technical Gymnasium – Higher Secondary Examination
2009 - 2012
Communication og IT A - English A

Personality

I'm a nerd. One of my big passions is computer games where I love to analyze games, love the culture around games and of course I love playing them. In my spare time, I sometimes spend my time doing something creative, like testing a Ui effect idea, making 3D models, or something completely new to expand my skills. I have also started going to Impro theater, where I perform in Odense, here I entertain people and at the same time entertain myself.
